PROJECTS

Courier Management System

2024 - 2025

Sanjivani college of Engineering

Web-based Application | PHP, MySQL, HTML, CSS, JavaScript

- Developed a courier management system with **role-based access control** for Admin, Manager, and Delivery Personnel to automate order creation, tracking, and delivery assignment.
- Designed a **responsive user interface** for managing courier details, real-time status updates, and tracking using unique order IDs.
- Implemented secure **backend logic** with PHP and MySQL for database operations, user authentication, and dynamic content management.

AgroEasy - Smart Agriculture Application Using Kotlin

2024 - Present

Sanjivani college of Engineering

Android Application | Kotlin, Firebase, AI Integration

- Created an intuitive farming application in Kotlin, enabling farmers to access services in English or Hindi with secure sign-in functionality.
- Integrated **AI-driven plant health detection**, **real-time weather updates**, and an **online marketplace** for agricultural products.
- Implemented educational features such as **short learning videos** and personalized dashboards to enhance user engagement and accessibility.

Personal Portfolio Website - Built with React.js and UX-Centered Design

Present

Sanjivani college of Engineering

React.js | UX/UI | Framer Motion

- Built a **responsive personal portfolio** using **React.js**, showcasing projects and skills.
- Designed a **clean UI/UX** with smooth navigation and animated interactions using **Framer Motion**.
- Integrated **interactive project cards**, animated tech icons, and a **responsive contact form**.
